

MedMira Inc.

Consolidated Financial Statements

July 31, 2012 and 2011

November 15, 2012

Management's responsibility for financial reporting

The accompanying consolidated financial statements of MedMira Inc. (the Company) are the responsibility of management and have been approved by the Board of Directors. The consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards (IFRS). The consolidated financial statements includes amounts and assumptions based on management's best estimates which have been derived with careful judgement.

In fulfilling its responsibilities, management has developed and maintains a system of internal accounting controls. These controls are designed to ensure that the financial records are reliable for preparation of the consolidated financial statements.

The Board of Directors of the Company is responsible for ensuring that management fulfils its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the consolidated financial statements and the accompanying management's discussion and analysis. The Board of Directors carries out this responsibility principally through its Audit Committee.

The Audit Committee is a subcommittee of the Board of Directors. It is responsible for oversight of the internal control and financial matters assisting the Company's management and independent auditors to ensure that the integrity of the financial reporting process is maintained.

The Company's independent auditors are appointed by the shareholders to conduct an audit in accordance with Canadian generally accepted auditing standards and their report follows.

Independent Auditor's Report

To the Shareholders of MedMira Inc.

We have audited the accompanying consolidated financial statements of MedMira Inc., which comprise the consolidated statements of financial position as at July 31, 2012, July 31, 2011 and August 1, 2010, and the consolidated statements of operations and comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended July 31, 2012 and July 31, 2011, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of MedMira Inc. as at July 31, 2012, July 31, 2011 and August 1, 2010, and its financial performance and its cash flows for the years ended July 31, 2012 and 2011 in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without modifying our opinion, we draw attention to Note 2 in the consolidated financial statements which indicates that for the year ended July 31, 2012, the Company incurred a net income of approximately \$3.4 million, consisting of a net loss from operations of \$2.2 million, a gain on forgiveness of debt of \$10.1 million, and other non-operating losses of \$4.5 million, and negative cash flows from operations of approximately \$2.2 million and as at July 31, 2012, the Company has an accumulated deficit of approximately \$70.5 million. These conditions, along with other matters as set forth in Note 2, indicate the existence of material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern.

The accompanying notes are an integral part of these consolidated financial statements.

1. Reporting entity

Nature of operations

MedMira Inc. (MedMira or the Company) is a biotechnology company headquartered in Canada. The address of the Company's registered office is 155 Chain Lake Drive, Suite 1, Halifax, Nova Scotia, B3S 1B3. OnSite Lab Holdings AG owns the majority of MedMira's shares and is the controlling shareholder. The consolidated financial statements of the Company as at and for the years ended July 31, 2012 and 2011, comprise the Company and its subsidiaries. MedMira, through its subsidiaries, is engaged in the business of research, development and manufacturing of rapid diagnostics and technologies. The Company invests in research in order to maintain and expand its position in the global diagnostics market. MedMira's research is focused on specific areas of the broader diagnostics market, namely the rapid, point-of-care, and *in vitro* sectors.

2. Basis of preparation

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standard (IFRS) as issued by the International Accounting Standards Board (IASB) and interpretations of the IFRS Interpretations Committee.

An explanation of how the transition to IFRS has affected the reported financial position, financial performance and cash flows of the Company is provided in Note 18.

The consolidated financial statements were authorized for issue by the Board of Directors on November 15, 2012.

b. Going-concern

The accompanying consolidated financial statements have been prepared on the basis of IFRS applicable to a going-concern, which contemplates the realization of assets and liquidation of liabilities during the normal course of operations. However, certain adverse conditions and events cast significant doubt upon the validity of this assumption. The Company has incurred losses and negative cash flows from operations on a cumulative basis since inception. For the year ended July 31, 2012, the Company realized a net income of approximately \$3.4 million (July 31, 2011 – net loss \$4.9 million), consisting of a net loss from operations of \$2.2 million (July 31, 2011 - \$1.9 million), a gain on forgiveness of debt of \$10.1 million (July 31, 2011 – \$nil), and other non-operating losses of \$4.5 million (July 31, 2011 - \$3.1 million). Negative cash flows from operations were approximately \$2.2 million (July 31, 2011 - \$1.9 million). As at July 31, 2012, the Company had an accumulated deficit of approximately \$70.5 million (July 31, 2011 - \$73.9 million). In addition to its on-going working capital requirements, the Company must secure sufficient funding for its research and development programs for existing commitments, including its current portion of loans of approximately \$7.2 million. These circumstances lend significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going-concern.

Management is pursuing other financing alternatives to fund the Company's operations so it can continue as a going-concern. Management plans to secure the necessary financing through new equity and debt arrangements. Nevertheless, there is no assurance that this initiative will be successful.

The Company is subject to risks associated with early stage companies, including but not limited to, dependence on key individuals, competition from substitute services and larger companies, and the requirement for the continued successful development and marketing of its products and services. The Company's ability to continue as a going-concern is dependent upon its ability to generate positive cash flow from operations and secure additional financing. These financial statements do not reflect the adjustments to carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going-concern assumption inappropriate and these adjustments could be material.

c. Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis with the exception of certain financial instruments, which are measured in accordance with the policy described in Note 3, and inventory, which is measured at the lower of cost and net realisable value.

d. Functional and presentation currency

The consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company and its subsidiaries. All financial information is presented in Canadian dollars and no rounding is used unless explicitly stated.

e. Use of estimates and judgements

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. These include but are not limited to:

- Amounts recorded for depreciation, impairment and reversals of impairment of property, equipment and intangibles which depend on estimates of net recoverable amounts based on expected economic lives and future cash flows from related assets;
- Amounts recorded for investment tax credits recoverable which are calculated based on the expected eligibility and tax treatment of qualifying scientific research and experimental development expenditures recorded in the Company's consolidated financial statements;
- Contingencies that are accrued on an undiscounted basis when it is probable that a liability for past events exists and the liability can be reasonably estimated. In determining whether a liability exists, the Company is required to make judgements as to the probability of future events occurring;
- The allocation of proceeds between common shares and warrants, determined by valuation of warrants which includes assumptions regarding the volatility and risk free rate;
- The fair value calculation of promissory notes, convertible debt, and long-term debt, which includes assumptions of the market rate and expected cash flows;
- The fair calculation of royalty liabilities, which includes determination of an appropriate discount rate, estimation of future sales, and estimation on price and cost of production;
- The fair value calculation of stock-based compensation, including determination of appropriate volatility and risk free rate;

- The fair value allocation of consideration for multiple element revenue arrangements, including timing of revenue recognition and allocation of cost; and
- Determination of operating segments.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements and in preparing the opening IFRS statement of financial position at August 1, 2010 for the purposes of the transition to IFRS, unless otherwise indicated.

The accounting policies have been applied consistently to the Company's subsidiaries.

The Company and its significant subsidiaries include:

	Country of incorporation	Ownership interest		
		%	%	%
		31-Jul-12	31-Jul-11	01-Aug-10
MedMira Inc.	Canada	100	100	100
MedMira Laboratories Inc.	Canada	100	100	100
Maple Biosciences Inc.	Canada	100	100	100

a. Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Company. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align with the policies adopted by the Company.

Transactions eliminated on consolidation

Intra-company balances and transactions, and any unrealized income and expenses arising from intra-company transactions, are eliminated in preparing the consolidated financial statements.

Jointly controlled operations

The Company is engaged in jointly controlled operations to market and sell MedMira's products. A jointly controlled operation is an agreement where both parties use its own property, plant and equipment and carries its own inventories. It incurs its own expenses and liabilities and raises its own finance, which represent its own obligations. Both parties have equal say in business decisions related to the jointly controlled operations and profit from sales are

split equally between parties for any sales generated. The Company recognizes its share of revenue from sales generated by the jointly controlled operations when the final product is delivered to the end customer and payment can be reasonably assured. Costs associated with the sales are recognized at the same time as revenue.

b. Foreign currency transactions

Transactions in foreign currencies are translated to Canadian dollars, the functional currency of the Company and its subsidiaries, at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in the foreign currency translated at the exchange rate at the end of the reporting period.

c. Financial instruments

Non-derivative financial assets

The Company initially recognizes loans, receivables, and deposits on the date of origination. All other financial assets are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position only when the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company classifies loans and receivables as non-derivative financial assets. Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses. Loans and receivables comprise trade and other receivables.

The Company also classifies cash as non-derivative financial assets. Cash comprise cash balances and bank overdrafts that are repayable on demand and form an integral part of the Company's cash management for the purpose of the statement of cash flows. Cash is classified as available for sale.

Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date of origination. All other financial liabilities are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument. The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expired

Financial assets and liabilities are offset and the net amount presented in the statement of financial position only when the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company has the following non-derivative financial liabilities: loans and borrowings, bank overdrafts, and trade and other payables. Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortized cost using the effective interest method.

Share capital

Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

Preferred shares

Preferred share capital is classified as equity if it is non-redeemable, or redeemable only at the Company's option, and any dividends are discretionary. Dividends thereon are recognized as distributions within equity.

Preferred share capital is classified as a liability if it is redeemable on a specific date or at the option of the shareholders, or if dividend payments are not discretionary. Dividends thereon are recognized as interest expense in profit or loss as accrued.

Stock purchase warrants

The fair value of these warrants is determined at the time the services are received by the Company and the expense is recognized in the statement of operations and comprehensive income. The fair value of the warrants is the fair value of the services received where this can be estimated reliably by comparable services by independent parties. In such circumstances where the fair value of the services received cannot be estimated reliably, the fair value is measured indirectly by reference to the fair value of the equity instrument granted, measured at the date the entity receives the relevant services. All such warrants are classified in a warrant reserve within equity.

Compound financial instruments

Compound financial instruments issued by the Company comprise convertible debentures that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.

The liability component of a compound financial instrument is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognized initially at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not remeasured subsequent to initial recognition.

Interest, dividends, losses and gains relating to the financial liability are recognized in profit or loss. Distributions to the equity holders are recognized in equity, net of any tax benefit.

d. Property, plant and equipment

Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes any expenditure that is directly attributable to the acquisition of the asset. Gains and losses on the disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income in profit or loss.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

The estimated useful lives for the current and comparative periods are as follows:

– office furniture and equipment	5 years
– leasehold improvements	lower of 7 years and length of lease
– manufacturing equipment	5 years
– laboratory equipment	5 years

Depreciation methods, useful lives, and residual values are reviewed at each financial year end and adjusted if appropriate.

e. Intangible assets

Research and development

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognized in profit or loss as incurred.

Development activities involve a plan or design for the production of new or substantially improved products and processes. A development expenditure is capitalized only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Company intends to, and has sufficient resources to, complete development and to use or sell the asset. The expenditure capitalized includes the cost of materials, direct labour, overhead costs that are directly attributable to preparing the asset for its

intended use, and borrowing costs on qualifying assets for which the commencement date for capitalization is on or after August 1, 2010. Any other development expenditure is recognized in profit or loss as incurred.

A capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment losses.

Other intangible assets

Other intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortization and accumulated impairment losses.

Subsequent expenditure

A subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. Any other expenditure, including an expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

Amortization

Amortization is calculated over the cost of the asset, or other amount substituted for cost, less its residual value.

Amortization is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the current and comparative periods are as follows:

Patents and trademarks	10-20 years
------------------------	-------------

f. Leased assets

Leases with terms in which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and the leased assets are not recognized in the Company's statement of financial position.

g. Inventories

Raw materials inventory consists of chemicals, plastic components and packaging materials. Work in process inventory (WIP) includes partially assembled tests, and any materials that have been modified, but not yet converted to finished products. Finished product inventory includes completed diagnostics tests in a state ready for sale. The Company does not carry inventory that would be considered long-term.

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the first-in first-out principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overhead based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

h. Impairment

Financial assets (including receivables)

Financial assets, other than those at fair value through profit and loss, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

Long-lived assets

The carrying amounts of the Company's long-lived assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit (CGU) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the CGU).

An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

i. Employee benefits

Short-term employee benefits

Short-term employee benefit obligations such as vacation and healthcare benefits are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

Share-based payment transactions

The grant date fair value of share-based payment awards granted to employees is recognized as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. Under the Company's current option plan, options vest at the date of issuance; therefore, the full value of options is recorded as an increase in equity at the date of issuance.

j. Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

Onerous contracts

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on the assets associated with that contract.

k. Revenue

Goods sold

Revenue from the sale of goods in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Down payments are recognized as deferred revenue until such time as the revenue associated with the sales order meets the criteria for revenue recognition. Revenue is recognized when persuasive evidence exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognized as a reduction of revenue as the sales are recognized.

The timing of the transfers of risks and rewards varies depending on the individual terms of the contract of sale. For sales of rapid diagnostics, transfer typically occurs when the product is shipped from the Company's warehouse; however, for some international shipments, transfer may only occur when goods are received.

When two or more revenue generating activities or deliverables are sold under a single arrangement, each deliverable that is considered to be a separate unit of account is accounted for separately. The allocation of consideration from a revenue arrangement to its separate units of account is based on the relative fair values of each unit. If the fair value of the delivered item is not reliably measurable, then revenue is allocated based on the difference between the total arrangement consideration and the fair value of the undelivered item.

Services

Revenue from services rendered is recognized in profit or loss in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed by reference to surveys of work performed.

Royalties and licence fees

Revenue from royalties and licences is recognized when the terms of the royalty or licence agreement are met, payment is reasonably assured, and payment can be reliably measured. Licences subject to attaining milestones are

recognized as milestones are reached. Non-refundable up-front license fees are recognized when no uncertainty about collection exists. It is recognized on a basis that reflects the timing, nature and value of the benefits provided.

Deferred revenue

All deferred revenue is classified as current and consists of customer advances for product that has not yet been shipped or the conditions required to account for payments as revenue have not yet been met.

l. Government grants

Government grants are recognized initially as deferred revenue at fair value when there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant. Grants that compensate the Company for expenses incurred are recognized in profit or loss as a reduction in expense on a systematic basis in the same periods in which the expenses are recognized.

The company also receives government loans with below market interest rates. These loans are classified as government grants. The benefit from the grant is determined based on the difference between the amount received and the fair value of the loan and is recognized in profit or loss as a reduction in expense on a systematic basis in the same periods in which the expenses are recognized.

m. Lease payments

Payments made under operating leases are recognized in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognized as a part of the total lease expense, over the term of the lease.

n. Finance income and finance costs

Finance costs comprise interest expense on borrowings. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognized in profit or loss using the effective interest method.

o. Future income taxes

The Company uses the liability method of accounting for income taxes. Under this method, current income taxes are recognized for the future income tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using the substantively enacted tax rates that will be in effect when the differences are expected to reverse or when losses are expected to be utilized. The effect on future income tax assets and liabilities of a change in tax rates is recognized in operations in the year in which the change occurs.

p. Earnings and loss per share

Basic earnings/loss per share (EPS) amounts are calculated by dividing net profit/loss for the year attributable to common equity holders of the parent by the weighted average number of common shares outstanding during the year.

Diluted EPS is determined by adjusting the net profit/loss attributable to common shareholders and the weighted average number of common shares outstanding. Diluted EPS is equal to the basic EPS in periods of a net loss as the exercise of options and warrants would be anti-dilutive. During profitable periods net income is adjusted by adding back the after-tax effect of any interest expense on dilutive convertible debentures, weighted average common

shares outstanding is adjusted to include the effects of the additional shares that would be issued upon conversion of debentures, as well as the addition of shares that would be issued on exercise options or warrants.

q. Fair value of stock options and warrants

The Company makes certain estimates and assumptions when calculating the fair values of stock options and warrants granted. The company uses an option pricing model, which includes significant assumptions including estimate of expected volatility, expected life, expected dividend rate and expected risk-free rate of return. Changes in these assumptions may result in a material change to the expense recorded for the issuance of stock options and warrants.

r. New standards and interpretations not yet adopted

A number of new standards, and amendments to standards and interpretations, were not yet effective for the year ended July 31, 2012, and have not been applied in preparing these consolidated financial statements. None of these new standards or amendments are expected to have a significant effect on the financial results of the Company.

Accounting standards issued but not yet applied:

IFRS 9, "Financial Instruments": The International Accounting Standards Board ("IASB") has issued IFRS 9, "Financial Instruments", effective for annual periods beginning on or after January 1, 2015, with early adoption permitted. IFRS 9 introduces net classification and measurement requirements for financial instruments.

IFRS 10, "Consolidated Financial Statements": The IASB issued IFRS 10, "Consolidated Financial Statements", effective for annual periods beginning on or after January 1, 2013. IFRS 10 replaces portions of IAS 27, "Consolidated and Separate Financial Statements", that addresses consolidation, and supersedes Standing Interpretations Committee (SIC) SIC-12 in its entirety. The objective of IFRS 10 is to define the principles of control and establish the basis of determining when and how an entity should be included within a set of consolidated financial statements. IAS 27 has been amended to reflect the issuance of IFRS 10 and retains guidance only for separate financial statements.

IFRS 11, "Joint Ventures": The IASB issued IFRS 11, "Joint Ventures", effective for annual periods beginning on or after January 1, 2013. IFRS 11 supersedes IAS 31, "Interest in Joint Ventures", and SIC-13, "Jointly Controlled Entities – Non Monetary Contributions by Venturers". Through an assessment of the rights and obligations in an arrangement, IFRS 11 establishes principles to determine the type of joint arrangement and guidance for financial reporting activities required by the entities that have an interest in arrangements which are controlled jointly. As a result of the issuance of IFRS 10 and IFRS 11, IAS 28 was amended to reflect the guidance provided in IFRS 10 and IFRS 11.

IFRS 12, "Disclosure of Interests in Other Entities": The IASB issued IFRS 12, "Disclosure of Interests in Other Entities", effective for annual periods beginning on or after January 1, 2013. IFRS 12 requires extensive disclosures relating to a company's interests in subsidiaries, joint arrangements, associates, and unconsolidated structured entities. IFRS 12 enables users of the financial statements to evaluate the nature and risks associated with its interests in other entities and the effects of those interests on its financial position and performance.

IFRS 13, "Fair Value measurement": The IASB issued IFRS 13, "Fair Value Measurement", effective for annual periods beginning on or after January 1, 2013. IFRS 13 defines fair value, provides guidance in a single framework for measuring fair value and identifies the required disclosures pertaining to fair value measurement.

Amendments to standards

IAS 19, "Employee Benefits", has been amended effective for annual periods beginning on or after January 1, 2013. The revised standard requires immediate recognition of actuarial gains and losses in other comprehensive income, eliminating the previous options that were available. A number of other amendments have been made to recognition, measurement and classification.

4. Revenue

	31-Jul-12	31-Jul-11
	\$	\$
Goods sold	938,356	909,869
Royalties and licence revenues	32,275	-
Total revenues	970,631	909,869

The Company organizes and records revenue based on major geographical territories around the world. The table below provides the geographic breakdown of revenue.

	31-Jul-12	31-Jul-11
	\$	\$
North America	588,417	540,340
Latin America and the Caribbean	132,830	9,105
Europe	8,098	106,115
Asia Pacific	239,246	178,403
Other	2,040	75,906
Total revenue	970,631	909,869

5. Inventories

As at July 31, 2012, there were no valuation allowances against inventory (July 31, 2011 - \$nil, August 1, 2010 - \$nil).

During the year ended July 31, 2012, inventory valued at \$271,402 was expensed as a cost of goods sold (July 31, 2011 - \$430,527).

	31-Jul-12	31-Jul-11	01-Aug-10
	\$	\$	\$
Raw materials and consumables	95,476	83,677	147,592
Work in process	98,192	116,214	99,293
Finished goods	32,186	14,710	112,756
Total inventories	225,854	214,601	359,641

6. Property, plant and equipment

During the year ended July 31, 2012, the Company did not identify any indicators of impairment (July 31, 2011 – nil, August 1, 2010 – nil). The Company did not make any commitment to acquire property, plant and equipment during the year ended July 31, 2012 (July 31, 2011 – nil, August 1, 2010 – nil).

The table below summarizes changes in property, plant and equipment.

	Leasehold improvements \$	Laboratory equipment \$	Manufacturing equipment \$	Office equipment and furniture \$	Total \$
Cost					
Balance at August 1, 2010	561,076	467,028	702,478	508,665	2,239,247

Balance at July 31, 2011	2,584,898	258,136	2,843,034
Balance at July 31, 2012	2,584,898	258,136	2,843,034
Carrying amounts			
At August 1, 2010	1	1	2
At July 31, 2011	1	1	2
At July 31, 2012	1	1	2

The Company acquired product technology and intellectual properties in 2000 through the acquisition of Precious Life Savings Products Inc. and MedMira Laboratories Inc. In 2001, the Company recorded an impairment charge to write-down these assets to a nominal value. There is no indication that this impairment has reversed.

During 2006, the Company acquired intellectual properties, in the form of patents and technology with a value of \$2,102,569 related to the acquisition of Maple Biosciences Inc. and the BAG-1 technology. During 2008, management reduced its research and development efforts related to these intangible assets and recorded an impairment charge to write-down these assets to a nominal value. Impairment charges at July 31, 2012 total \$1,693,046 (July 31, 2011 - \$1,693,046, August 1, 2010 - \$1,693,046). There is no indication that this impairment has reversed.

8. Capital and other components of equity

a. Authorized

Unlimited number of Series A preferred shares, non-voting, non-participating, redeemable at \$0.001 per share after March 31, 2010, convertible into an equal number of common shares upon the Company meeting certain milestones. The preferred shares earn no dividends.

Unlimited number of voting common shares without nominal or par value.

b. Share capital issued

	Number of		Value of		
	Common shares	Preferred shares	Common shares \$	Preferred shares \$	Share capital \$
Balance at August 1, 2010	202,264,320	5,000,000	49,497,106	2,500	49,499,606
Issued to repay debt	20,000,000	-	636,588	-	636,588
Issued for cash	30,000,000	-	869,554	-	869,554
Share issuance costs	-	-	(20,498)	-	(20,498)
Balance at July 31, 2011	252,264,320	5,000,000	50,982,750	2,500	50,985,250
Issued to repay debt	11,378,704	-	390,931	-	390,931
Issued for cash	128,621,296	-	4,320,752	-	4,320,752
Share issuance costs	-	-	(35,750)	-	(35,750)
Balance at July 31, 2012	392,264,320	5,000,000	55,658,683	2,500	55,661,183

The total common shares issued and outstanding includes 4,064,464 common shares held in escrow scheduled to be released when the company obtains positive operating cash flow.

The Series A preferred shares had a stated capital of \$2,500 at July 31, 2012 (July 31, 2011 - \$2,500, August 1, 2010 - \$2,500).

c. Warrants

	Number of warrants	Warrant reserve \$
Balance at August 1, 2010	50,452,833	1,211,472
Expired warrants	(4,333,333)	-
Issued to repay debt	20,000,000	363,412
Issued for cash	30,000,000	630,446
Balance at July 31, 2011	96,119,500	2,205,330
Issued to repay debt	11,378,704	178,004
Issued for cash	128,621,296	2,110,313
Balance at July 31, 2012	236,119,500	4,493,647

During the year ended July 31, 2012, 140,000,000 stock purchase warrants were issued in conjunction with shares issued. At July 31, 2012, the Company had the following warrants outstanding:

Issued	Number	Exercise price \$	Expiry date
December 22, 2008	6,119,500	0.10	December 22, 2013
November 4, 2009	40,000,000	0.10	November 4, 2012
December 8, 2010	20,000,000	0.10	December 8, 2014
July 18, 2011	30,000,000	0.10	July 18, 2015
January 31, 2012	20,000,000	0.10	January 31, 2016
June 11, 2012	<u>120,000,000</u>	0.10	June 11, 2016
Total outstanding warrants	<u>236,119,500</u>		

d. Stock based compensation

The Company has established a stock option plan for its employees, officers, and directors. All options vest immediately upon issue and the Company is authorized to issue a maximum of 6,000,000 options annually upon approval by shareholders. The options are exercisable into an equivalent of 5,840,000 common shares (July 31, 2011 – 3,845,000) at exercise prices ranging between \$0.10 and \$0.34. The options expire between the dates of October 10, 2012 and October 13, 2014. During the year the company issued 3,290,000 options (July 31, 2011 – nil) with a fair value of \$68,848 (July 31, 2011 – nil). All options outstanding at July 31, 2012 are exercisable.

The total options outstanding from August 1, 2010 to July 31, 2012 are shown below.

	Number	Weighted average exercise price \$	Stock based compensation reserve \$
Options outstanding August 1, 2010	4,713,000	0.14	1,030,354
Options expired/forfeit	(868,000)	0.21	-
Options outstanding July 31, 2011	3,845,000	0.13	1,030,354
Options granted	3,290,000	0.10	68,848
Options expired/forfeit	(1,295,000)	0.10	-
Options outstanding July 31, 2012	5,840,000	0.12	1,099,202

The following table summarizes information about options outstanding and exercisable at July 31, 2012:

Range of exercise prices	Number outstanding and exercisable	Weighted average exercise price per share	Weighted average remaining contractual life
\$		\$	(Years)
0.100	5,340,000	0.10	1.73
0.335	500,000	0.34	0.92
	5,840,000	0.12	1.66

9. Gain (loss) per share

	31-Jul-12	31-Jul-11
	\$	\$
Net income (loss) attributable to common shareholders	3,372,302	(4,929,183)
Interest expense on convertible debenture	58,500	-
Diluted income (loss)	3,430,802	(4,929,183)
Issued common shares	392,264,320	252,264,320
Weighted average number of common shares	278,985,631	216,593,087
Weighted average number of debenture dilutive shares	3,581,267	-
Weighted average number of warrants	122,840,811	-
Weighted average number of options	6,296,434	-
Weighted average number of diluted shares	411,704,143	216,593,087
Basic earnings (loss) per share	0.012	(0.023)
Diluted earnings (loss) per share	0.008	(0.023)

The diluted weighted average number of common shares outstanding is the same as the basic weighted average number of common shares outstanding for the year ended July 31, 2011, as the Company had a net loss and the exercise of potentially dilutive instruments would be anti-dilutive.

10. Loans and borrowings

a. Loans

	31-Jul-12	31-Jul-11	01-Aug-10
	\$	\$	\$
Due to directors and officers on demand, interest at 3% - 25%	-	6,554,465	5,045,272
Due on demand, interest at 3% - 15%	1,783,738	2,439,448	1,970,507
9% convertible debenture	650,000	650,000	650,000
ACOA loan 1	358,135	368,085	374,085
ACOA loan 2	164,264	168,382	171,382
ACOA loan 3	487,916	496,250	500,000
ACOA loan 4	488,666	497,000	500,000
Nova Scotia Government loan	3,480,000	3,480,000	3,480,000
Total loan principal	7,412,719	14,653,630	12,691,246
Long term portion of principal	227,803	-	-
Current portion of principal	7,184,916	14,653,630	12,691,246

The loans as at July 31, 2012, July 31, 2011, and August 1, 2010 include \$75,128, \$6,333,675, and \$5,045,270 respectively, denominated in US currency (US \$75,000, US \$6,628,650, and US \$4,906,418 respectively).

Due to directors and officers on demand, interest at 3%-25%

As at July 31, 2012 there were no loans due to directors and officers (see Note 10.b). At July 31, 2011, the company had \$6,554,465 (August 1, 2010 – \$5,045,272) due to directors and officers with interest rates ranging from 3% to 25%. At July 31, 2011 and August 1, 2010 these loans were in default and classified as current liabilities. A director has provided a personal guarantee for one of the loans in the amount of US \$380,290.

Loans, interest at 3% - 15%

Loans balance of \$1,783,738 includes loans totalling \$1,543,934 (July 31, 2011 - \$2,439,448, August 1, 2010 – \$1,970,507) with interest terms of 3%-15% which were in default as at July, 31, 2012. These loans have been classified as current liabilities. During July 31, 2012, a portion of the outstanding debt was settled (see Note 10.b).

The remaining balance totalling \$239,803 consists of two loans bearing interest at 3% with payment terms over 5 years. The terms of these two loans were renegotiated prior to the July 31, 2012 year end. Of the payments due on these loans, \$12,000 is due within 1 year and has been recognized as current, \$227,803 has been recognized as long term and due in more than 1 year.

9% convertible debenture

Convertible debenture with a coupon interest rate of 9% per annum, payable monthly, maturing four years from the date of close. The principal was repayable in full on August 28, 2012. The debenture is convertible in whole or in part into common shares at \$0.1815. If the remaining balance of the debenture was converted, it would result in the issuance of 3,581,267 common shares. The loan is secured by interest on intellectual property and on the step-up technology. The debenture is in default and is classified as a current liability.

ACOA loan 1

Loan payable to the Atlantic Canada Opportunities Agency, non-interest bearing, payable in six payments of \$500 and 40 payments of \$9,950 and one payment of \$5,935 beginning November 2006. During fiscal year ended July 31, 2010, payment terms changed to be six payments of \$1,000 and 37 payments of \$9,950. The loan is secured by all present and after acquired personal property, excepting consumer goods. The loan is currently in default and classified as a current liability.

ACOA loan 2

Loan payable to the Atlantic Canada Opportunities Agency, non-interest bearing, payable in 48 equal monthly principal instalments beginning January 2008. During fiscal year ended July 31, 2010, payment terms changed to be six payments of \$500 and 41 payments of \$4,117. The loan is secured by all present and after acquired personal property, excepting consumer goods. The loan is currently in default and is classified as a current liability.

ACOA loan 3

Loan payable to the Atlantic Canada Opportunities Agency, non-interest bearing, payable in five payments of \$750 and 60 payments of \$8,334 beginning July 2010. The loan is secured by all present and after acquired personal property, excepting consumer goods. The loan is currently in default and is classified as a current liability.

ACOA loan 4

Loan payable to the Atlantic Canada Opportunities Agency, non-interest bearing, payable in four payments of \$750 and 60 payments of \$8,334 beginning August 2010. The loan is secured by all present and after acquired personal property, excepting consumer goods. The loan is currently in default and is classified as a current liability.

Nova Scotia Government loan

Loan payable to the Nova Scotia Government Department of Economic and Rural Development and Tourism with interest bearing at the Province's five year cost of funds plus 2%. The loan is payable in 54 monthly instalments beginning June 1, 2010. The loan is secured by first interest on intellectual property and on the Maple Bio sensor technology. The loan principal and interest payments are in arrears and therefore the loan is classified as a current liability.

b. Significant refinancing

During the year ended July 31, 2012, the company negotiated the forgiveness and settlement of debt resulting in the payment of \$1,806,481 to settle \$11,849,307 in principal and accrued interest. The difference between the settled amount and the payment, \$10,042,826, was booked as a gain on forgiveness of debt in the statement of operations and comprehensive income and includes a gain on forgiveness of principal of \$8,114,161 and gain on forgiveness of accrued interest of \$1,928,665.

11. Financial instruments

a. Capital management

The Company's objectives when managing capital are to provide an adequate return to shareholders, safeguard its assets, maintain a competitive cost structure and continue as a going-concern in order to pursue the development and sale of its products. To maximize ongoing development and growth effort, the Company did not pay out dividends during the period ended July 31, 2012 (July 31, 2011 - \$nil). The Company is not anticipating paying out dividends during the year ended July 31, 2013.

The Company's capital is summarized in the table below:

	31-Jul-12	31-Jul-11	01-Aug-10
	\$	\$	\$
Total debt	7,412,719	14,653,630	12,691,246
Cash and cash equivalents	<u>(2,416,809)</u>	<u>(1,026,763)</u>	62,745
Net debt	4,995,910	13,626,867	12,753,991
Total shareholders deficiency	<u>(8,708,299)</u>	<u>(19,113,699)</u>	<u>(16,664,018)</u>
Total capital	<u>(3,712,389)</u>	<u>(5,486,832)</u>	<u>(3,910,027)</u>

To facilitate the management of its capital structure, the Company prepares annual expenditure operating budgets that are updated as the input parameters change. Cash flow is monitored and updated daily. The Company is in default on many of its loans and convertible debentures. As a result, these amounts are classified as current liabilities.

b. Categories of financial instruments and fair value

	July 31, 2012		July 31, 2011		August 1, 2010	
	Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount	Fair value
	\$	\$	\$	\$	\$	\$
Financial assets						
<i>Available for sale</i>						
Cash	2,416,809	2,416,809	1,026,763	1,026,763	(62,745)	(62,745)
<i>Amortized cost</i>						
Trade and accounts receivable	164,292	164,292	82,942	82,942	40,289	40,289
Financial liabilities						
<i>Amortized cost</i>						
Trade and other payables	3,290,152	3,290,152	5,048,216	5,048,216	3,887,097	3,887,097
Current portion of debt	7,184,916	7,184,916	14,653,630	14,653,630	12,691,246	12,691,246
Long term portion of debt	227,803	227,803	-	-	-	-

c. Foreign currency risk

Most of the Company's sales are made in foreign currencies. The carrying amounts of the Company's US dollar foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

	31-Jul-12	31-Jul-11	1-Aug-10
	US\$	US\$	US\$
Cash and cash equivalents	25,930	352,986	-
Trade and other receivables	44,901	20,041	13,030
Accounts payable and accrued liabilities	165,422	2,206,328	1,147,148
Deferred income	523,541	637,337	574,840
Debt	75,000	6,628,650	4,906,418

A one cent change in the US dollar exchange rate would result in approximately a \$7,000 (2011 - \$9,500) impact on the balance sheet and consolidated statement of income. The Company's foreign exchange exposure to the US dollar has decreased in the year ended July 31, 2012 due mainly to the settlement of US dollar denominated loans.

d. Interest rate risk

The Company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates. The company presently holds a single floating interest rate loan with the Nova Scotia Government Department of Economic and Rural Development and Tourism with interest bearing at the Province's five year cost of funds plus 2%. As a result, the Company is exposed to fluctuations in the province of Nova Scotia's cost of funds. A 1% increase in the Nova Scotia cost of funds rate would result in approximately \$34,800 in additional interest per year.

e. Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. The company mitigates this risk by requiring a 50% down payment on most orders at the time of purchase, and the remaining 50% prior to shipment. The receivables balance of \$164,292 represents primarily trade receivables from sale of the Company's products. Historically, there have been no collection issues and the Company does not believe it is subject to any significant concentration of credit risk.

f. Liquidity risk

Liquidity risk represents the possibility that the Company may not be able to gather sufficient cash resources, when required and under reasonable conditions, to meet its financial obligations. At present, the company does not have sufficient cash to meet all of its continual liabilities.

The Company also continues to have an ongoing need for substantial capital resources to research and develop, commercialize and manufacture its products and technologies. The Company is currently not yet receiving a significant ongoing revenue stream, nor can it be certain that it will receive significant revenue before additional cash is required. As a result, there can be no assurance that the Company will have sufficient capital to fund its ongoing operations, develop or commercialize its products without future financing.

The Company's contractual maturities for the Company's financial liabilities are outlined in the table below:

For the year ended July 31, 2012

	Total \$	Less than 1 year \$	1 to 3 years \$	4 to 5 years \$	After 5 years \$
Loans	6,762,719	6,534,916	99,922	89,921	37,960
Debentures	650,000	650,000	-	-	-
Total debt	7,412,719	7,184,916	99,922	89,921	37,960

For the year ended July 31, 2011

	Total \$	Less than 1 year \$	1 to 3 years \$	4 to 5 years \$	After 5 years \$
Loans	14,003,630	14,003,630	-	-	-
Debentures	650,000	650,000	-	-	-
Total debt	14,653,630	14,653,630	-	-	-

Payments noted above do not include interest payments.

g. Fair value of financial instruments

Management has determined that the carrying amounts of financial assets and financial liabilities recognized in the consolidated financial statements approximate fair value.

12. Fair value measurement of royalty liability

The Company adjusted a royalty contract valued at \$260,000 to fair value of \$326,020 during the year ended July 31, 2012 based on the projected cash flows on future sales. Management used an effective annual discount rate of 23.17% which it believes fairly represents the market rate for the time value of money and the risks specific to the liability. During the year ended July 31, 2012, \$75,422 in interest was accrued on this liability (July 31, 2011 - \$nil).

The calculation of fair value was based on management estimates that include: the likelihood and timing of completion of the research and development of the product, the likelihood of obtaining regulatory approval, the demand for the product at the time of completion, the price the Company will be able to sell the product for, and the cost of manufacturing the product.

	31-Jul-12 \$	31-Jul-11 \$
Provision for royalty	260,000	260,000
Increase in royalty	66,021	-
Accrued interest	75,422	-
Total provision for royalty	401,443	260,000

13. Related parties

The following transactions occurred with related parties during the year ended July 31, 2012:

- Interest of \$3.2 million was capitalized on a loan from a director (July 31, 2011 - \$2.6 million).
- \$7.0 million was invested in 140 million common shares and warrants in the course of the year by OnSite Lab Holding AG (July 31, 2011 - \$2.5 million).

The following balances with related parties were outstanding at July 31, 2012:

- A receivable balance of \$8,630 is owed to MedMira by a company which is presided over by a director (July 31, 2011 – \$10,521, August 1, 2010 - \$nil).
- An accounts payable balance of \$22,083 is owed to a director of MedMira (July 31, 2011 - \$1.7 million, August 1, 2010 - \$1.6 million).
- A royalty provision owed to OnSite Lab Holding AG of \$401,443 has been recorded (July 31, 2011 – \$260,000, August 1, 2010 - \$nil).

The remuneration of directors and other members of key management personnel during the year were as follows:

	31-Jul-12	31-Jul-11
	\$	\$
Short-term benefits	328,947	330,900
Share-based payments	40,806	-
Total remuneration	369,753	330,900

14. Research and development

The Company receives government grants to offset the cost of developing certain products. These grants are recognized as a credit against the research expense in the period the expense is incurred. There are no unfulfilled conditions regarding the grants. The following table provides a summary of aggregate research costs and reimbursements:

	31-Jul-12	31-Jul-11
	\$	\$
Research and development expenses	530,114	345,540
Less: reimbursed research and development expenses	331,092	70,268
Net research and development expense	199,022	275,272

Included in the total for research and development expenses is \$373,819 specifically related to the reimbursements received during the year ended July 31, 2012 (July 31, 2011 – \$70,268).

15. Income taxes

a. Reconciliation of total tax expense

The effective rate on the Company's loss before income tax differs from the expected amount that would arise using the combined statutory income tax rates. A reconciliation of the difference is as follows:

	31-Jul-12	31-Jul-11
	\$	\$
Income (loss) before income tax	3,372,302	(4,892,184)
Income tax rate	<u>31.6%</u>	<u>33.1%</u>
Income tax expense (recovery) at the combined statutory income tax rate	1,066,491	(1,619,313)
	-	-
Non-taxable portion of capital (gains) and losses	-	25,156
Non-taxable portion of other (gains) and losses	(3,176,044)	-
Non-deductible stock-based compensation	37,992	8,275
Non-deductible interest	102,844	26,692
Non-recognition of deferred tax assets due to unused tax losses and deductible temporary differences	1,663,428	1,699,884
Excess amortization over capital cost allowance	6,113	9,965
Scientific research and development expenditures	66,297	28,769
Non-deductible exchange rate losses (gains)	260,380	(165,331)
Other	<u>(27,501)</u>	<u>(14,097)</u>
Income tax recovery	<u>-</u>	<u>-</u>

b. Unrecognized deductible temporary differences, unused tax losses and unused tax credits

Deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax assets have been recognized are attributable to the following:

	31-Jul-12	31-Jul-11	1-Aug-10
	\$	\$	\$
Non-capital losses	30,506,035	39,783,796	35,147,680
Scientific research and development costs	3,986,048	3,866,897	3,793,018
Investment tax credits	1,287,974	1,250,824	1,230,826
Share issuance costs	80,791	57,377	82,075
Variable liability	141,443	-	-
Unrealized foreign exchange	98,274	-	-
Cumulative eligible capital	281,645	281,645	281,645
Property and equipment	<u>1,860,876</u>	<u>1,841,548</u>	<u>1,808,000</u>
Total	<u>38,243,086</u>	<u>47,082,087</u>	<u>42,343,244</u>

The right to claim the non-capital losses and investment tax credits expire as follows:

	Non-capital losses \$	Investment tax credits \$
Year ending July 31, 2013	2,976,766	-
Year ending July 31, 2014	3,786,509	-
Year ending July 31, 2018	-	22,331
Year ending July 31, 2019	-	109,128
Year ending July 31, 2020	-	287,891
Year ending July 31, 2021	-	118,020
Year ending July 31, 2022	-	88,957
Year ending July 31, 2023	-	99,010
Year ending July 31, 2024	-	127,554
Year ending July 31, 2025	4,027,473	128,373
Year ending July 31, 2026	2,832,002	87,870
Year ending July 31, 2027	1,863,697	106,661
Year ending July 31, 2028	1,814,749	28,763
Year ending July 31, 2029	1,716,876	26,268
Year ending July 31, 2030	1,768,554	19,998
Year ending July 31, 2031	<u>9,719,409</u>	<u>37,150</u>
	<u>30,506,035</u>	<u>1,287,974</u>

At July 31, 2012, the Company has no unrecognized deferred tax liability (July 31, 2011 - \$nil, August 1, 2010 - \$nil) for taxes that would be payable on the unremitted earnings of certain of the Company's subsidiaries.

16. Operating segments

Management has determined that the Company has one reportable operating segment, rapid diagnostic products. This segment accounts for all of MedMira's revenue, cost of sales and operating expenses. Determination of operating segment was based on the level of financial reporting to the Company's chief decision makers.

17. Subsequent events

Following the year ended July 31, 2012, the Company paid \$312,992 to settle \$1,021,503 in debt. This renegotiation was the final stage of MedMira's debt restructuring plan and results in no debt in default. Interest rates on all remaining debt are at or below 3% with interest only payments for the remainder of the fiscal year ended July 31, 2013.

18. Explanation of transition to IFRS

The Company's consolidated financial statements for the year ending July 31, 2012 are the Company's first set of annual financial statements that comply with IFRS as issued by the IASB including application of IFRS 1. IFRS 1 requires that comparative financial information be provided, therefore the Company has applied IFRS as of August 1, 2010.

IFRS requires first-time adopters to retrospectively apply all IFRS that will be in effect at its July 31, 2012 reporting date. However, it also provides for certain optional exemptions and certain mandatory exemptions for first-time

adopters. The Company has applied certain of these exemptions to its opening Statement of Financial Position dated August 1, 2010 as described below.

a. Elected exemptions for full retrospective application

Business combinations

IFRS 1 indicates that a first-time adopter may elect not to apply IFRS 3 - Business Combinations (IFRS 3) retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has elected to use this exemption and has only applied IFRS 3 to business combinations that occurred on or after August 1, 2010.

Borrowing costs

The Company has elected the transition date, August 1, 2010, as the date to apply the transitional provisions set out in IAS - 23 Borrowing Costs (IAS 23). The Company will capitalize borrowing costs in accordance with IAS 23 for qualifying assets which commenced construction after August 1, 2010.

Arrangements containing a lease

The Company has elected to apply transitional provisions under IFRIC - 4 Determining Whether an Arrangement Contains a Lease (IFRIC 4). The Company has not reassessed arrangements containing leases as of August 1, 2010.

Share-based payment transactions

IFRS 1 permits first-time adopters to not apply IFRS 2 to equity instruments that were granted on or before November 7, 2002 or equity instruments that were granted subsequent to November 7, 2002 and vested before the date of transition to IFRS. The Company has elected to take this exemption and not apply IFRS 2 to awards that vested prior to August 1, 2010.

b. Mandatory exceptions to retrospective application

Estimates

In accordance with IFRS 1, an entity's estimates at the date of transition to IFRS must be consistent with estimates made for the same date under previous Canadian GAAP (GAAP), unless there is objective evidence that those estimates were made in error. Hindsight was not used to create or revise estimates and accordingly the estimates made by the Company under GAAP are consistent with their application under IFRS.

c. Reconciliation from GAAP to IFRS

The accounting policies set out in Note 3 have been applied in preparing the consolidated financial statements for the year ended July 31, 2012, the comparative information presented in these financial statements for the year ended July 31, 2011 and in the preparation of an opening IFRS statement of financial position at August 1, 2010 (the Company's date of transition).

A reconciliation of the impact of the transition from GAAP to IFRS on the Company's financial position, financial performance and cash flows is set out in the following tables and notes that accompany the tables.

Reconciliation of consolidated statement of financial position

	July 31, 2011			August 1, 2010		
	Previous	Effect of	IFRS	Previous	Effect of	IFRS
	Canadian GAAP	transition to		Canadian GAAP	translation to	
	\$	\$	\$	\$	\$	\$
Total assets	1,492,123	-	1,492,123	568,178	-	568,178
<i>Current liabilities</i>						
Bank indebtedness	-	-	-	62,745	-	62,745
Accounts payable and accrued liabilities	5,048,216	-	5,048,216	3,887,097	-	3,887,097
Unearned revenue	643,976	-	643,976	591,108	-	591,108
Current portion of debt	14,653,630	-	14,653,630	12,260,918	430,328	12,691,246
Total current liabilities	20,345,822	-	20,345,822	16,801,868	430,328	17,232,196
<i>Non-current liabilities</i>						
Provision for royalty	260,000	-	260,000	-	-	-
Long-term debt	-	-	-	430,328	(430,328)	-
Total non-current liabilities	260,000	-	260,000	430,328	(430,328)	-
Total liabilities	20,605,822	-	20,605,822	17,232,196	-	17,232,196
Total equity	(19,113,699)	-	(19,113,699)	(16,664,018)	-	(16,664,018)
Total liabilities and equity	1,492,123	-	1,492,123	568,178	-	568,178

Reclassification of long-term debt to current

The long-term debt recognized under GAAP was booked as non-current as renegotiated terms had been approved before August 23, 2010. Under IFRS, renegotiated terms must be approved prior to the balance sheet date of July 31, 2010. As a result, the Company has reclassified the long-term debt of \$430,328 from long-term debt to current portion of long-term debt.

Reconciliation of consolidated statement of changes in equity

There was no impact on the consolidated statement of changes in equity as at August 1, 2010 and July 31, 2011 as a result of the transition to IFRS.

Reconciliation of consolidated statement of comprehensive income

There was no impact on the consolidated statement of comprehensive income for the year ended July 31, 2011 as a result of the transition to IFRS. A reclassification of \$37,000 in recovery from income tax was recorded to warrant reserve resulting in a decrease in net income after tax of \$37,000.

Reconciliation of consolidated statement of cash flows

There was no significant impact on the statement of cash flows as the result of the transition to IFRS. Under IFRS, bank indebtedness has been included as a part of cash and cash equivalents. This has resulted in a decrease in opening cash and cash equivalents of \$62,745. In addition, IFRS allows payments of interest on debt to be treated as a finance cash flow resulting in a decrease in cash from financing and increase in operating cash flows of \$27,990.
