

DID YOU KNOW?

1.2 million Americans have HIV...but 1-in-8¹ don't know & they account for 1/3 of HIV transmissions in the U.S.²

In emergency departments, 55% of patients tested are discharged before getting test results.

Testing & treatment can reduce mother-to-child HIV transmission by 98%.

More than 8 million healthcare workers are at risk with 1 million needlesticks every year—only 66% are reported.

When you're waiting for HIV results, the anxious minutes until your status is revealed seem like forever.

FASTER RESULTS = LESS ANXIETY and more people know their status.

medmira

REVEAL[®]

G4

RAPID HIV-1/2 antibody test

WHAT IS Reveal G4?

- Next generation in the Reveal product line to test for HIV
- Patented Rapid Vertical Flow Technology™
- FDA-approved
- NEW capabilities in testing fingerstick and venipuncture whole blood specimens
- Instant Results

Introducing Reveal G4: helping people know when every second counts.

The only thing more important than knowing—is knowing faster. Contain transmission, prevent infection, and help people know with MedMira's Reveal[®] G4 for HIV.

G4 is the future of fast, accurate, easy point-of-care HIV testing.

18-Month Shelf Life

Room Temperature Storage

No Equipment Required

G4 tests many things

Serum, plasma—and **WHOLE BLOOD**—effectively extending the Reveal product line to any point-of-care setting, from doctors' offices to mobile clinics to pharmacies.

Goes anywhere anyone is at risk

Overall very high sensitivity and specificity in intended-use populations and POC settings.

Proven effective with at-risk populations

In a US multi-site clinical study conducted to support FDA approval of G4, whole blood specimens were tested for HIV in urban clinics serving high risk populations including MSM, IV drug users, sex workers, and those with a history of STIs, incarceration, and identified hepatitis infections.³

Los Angeles, California
